

# Issue Resolution Request

IRR: CLM908  
Received Date: 4/27/2020  
Priority: Med  
Status: Pending Resolution  
Requestor Name: Lori Raby  
Phone Number: (517) 284-8909  
Email: RabyL1@michigan.gov

**Business Requirement / Issue:** What is the business requirement / issue? Cite any applicable statute/rules, and attach a copy, if desired.

Include clarification in the implementation guide regarding data that can be required on Legacy claims and on FROI and SROI UR transactions.

**Background:** Claims R3.1 Element Requirement table currently has a column to indicate migration impact for each R3.1 data element. This column is intended to apply restrictions jurisdictions should use when defining data requirements for legacy claims because some data elements may not have been available when the claim was established; code descriptions and intended use are included in the instructions for the Element Requirement table. Legacy Claims Processing rules in Section 4 includes restrictions that don't accurately portray availability of some data elements.

1. Is the information currently being collected at this time by the submitter? If yes, detail current method of collecting the information. **Unsure**

**N/A**

2. If the information is not currently being collected, what timeline does the submitter expect or require for implementation of the proposed change?

3. What other methods of collection or reporting, if any, have been considered?

## Requester's Proposed Solution (optional):

1. Replace current Data requirement restrictions in the Legacy Claims Processing rules in Section 4 with some of the contents of the Element Requirement Table instructions so restrictions are managed within the standard and to promote consistent usages by receiving jurisdictions and senders. The Element Requirement table instructions would refer to the limitations described in the standard.

2. Add columns to the DN list in Section 2 to indicate Migration impact of each data element.

**Impact:** as new data elements are approved to be added to the standard, the migration impact should be evaluated. Migration Impact should be updated in DN list and Legacy Claims Processing rules based on the approval process.
