Proposed new Reportable Change codes for Add to reduce the amount of Exceptions to be documented. Removes Add from the other standard codes, unless it had an Exception (G's)

Code I = Required Change on Either. This code only applies to Data Elements contained on both the FROI and SROI, and the jurisdiction is collecting them on both. When indicated in the ~~Requirement Code~~ Reportable Change Column for ~~Add,~~ Update, Remove, or Delete, the Claim Administrator must send an 02 Change on either the FROI or the SROI but not both. ~~This code only applies to Data Elements contained on both the FROI and SROI, and the jurisdiction is collecting them on both.~~ The Jurisdiction will accept a change to the data element on either the FROI or SROI and the Claim Administrator will determine which transaction to send. (See Code Usage Limitations below)

Code IA = Required Add on Either. This code only applies to Data Elements contained on both the FROI and SROI, and the jurisdiction is collecting them on both. When indicated in the Reportable Change Column for Add, the Claim Administrator must send an 02 Change on either the FROI or the SROI but not both. The Jurisdiction will accept a change (Add) to the data element on either the FROI or SROI, only if the data element was not previously reported, and the Claim Administrator will determine which transaction to send. (See Code Usage Limitations below).

Code K = Required FROI Change. This code only applies to Data Elements contained on both the FROI and SROI, and the jurisdiction is collecting them on both. When indicated in the Reportable Change Column for ~~Add,~~ Update, Remove, or Delete, the Claim Administrator shall send an 02 Change on the FROI regardless of if a SROI has been accepted. (See Code Usage Limitations below)

Code KA = Required FROI Add. This code only applies to Data Elements contained on both the FROI and SROI, and the jurisdiction is collecting them on both. When indicated in the Reportable Change Column for Add, the Claim Administrator shall send an 02 Change (Add) on the FROI regardless of if a SROI has been accepted, only if the data element was not previously reported. (See Code Usage Limitations below)

Code J = Required Change by Transaction Type. This code only applies to Data Elements contained on both the FROI and SROI, and the jurisdiction is collecting them on both. When indicated in the ~~Requirement Code~~ Reportable Change Column for ~~Add,~~ Update, Remove, or Delete, the Claim Administrator shall send an 02 Change on the SROI only if a SROI has been previously accepted. If no SROI has been previously accepted then a FROI 02 Change is required. ~~This code only applies to Data Elements contained on both the FROI and SROI, and the jurisdiction is collecting them on both.~~ (See Code Usage Limitations below)

Code JA = Required Add by Transaction Type. This code only applies to Data Elements contained on both the FROI and SROI, and the jurisdiction is collecting them on both. When indicated in the Reportable Change Column for Add, the Claim Administrator shall send an 02 Change (Add) on the SROI only if a SROI has been previously accepted. If no SROI has been previously accepted then a FROI 02 Change is required.

Code Y = Required Change. This code only applies to Data Elements not contained on both the FROI and SROI. When indicated in the ~~Requirement Code~~ Reportable Change Column for ~~Add,~~ Update, Remove, or Delete, the Claim Administrator shall generate an MTC 02 Change and indicate the Data Element in the Change Variable Segment.

Code YA = Required Add. This code only applies to Data Elements not contained on both the FROI and SROI. When indicated in the Reportable Change Column for Add, the Claim Administrator shall generate an MTC 02 Change (Add) and indicate the Data Element in the Change Variable Segment, only if the data element was not previously reported.
