

Section 4 Variable Segment Population Rules 11 Payment Segment, rule d.

d. When required by the jurisdiction on their Element Requirement Table, a Payments segment is always sent on a PY MTC (or its corresponding CO or 02 MTC), unless the Reduced Benefit Amount Code of "S" or "N" is present. ~~OR~~ **A Payments segment shall also be present** when a jurisdiction requires the reporting of Payee on an IP, AP or RB. A Payments segment is sent for each Payment Reason Code described in the Population Restriction tab in the jurisdiction's Edit Matrix. The benefits represented by the Payment Reason Code in the Payments segment are also included in either the applicable "Sweep" or "Event" Benefits segment or Other Benefits segment.

Add rule k.

k. The Payments segment shall only contain payments related to the current event MTC limited to MTC IP, AP, PY, or RB (or its corresponding CO or 02 MTC). Payments previously reported related to a prior event shall not be present on a later event MTC. For example, the payment reported with the IP MTC should not be reported on the RB MTC.
