

Issue Resolution Request Form

The Issue Resolution Request (IRR) process is the IAIABC's method of changing the national EDI standard when modifications or clarifications are needed. Changes must be undertaken thoughtfully and deliberately, and the amount and level of work that is needed to adjust the standard must be managed carefully. Therefore, requests will be screened early in the IRR process to ensure that the issue may appropriately be addressed in an IAIABC EDI standard.

IRR: CLM817
DATE: 01/11/2016
PRIORITY: MED
STATUS: Open
FROM: Jim Vogel / Minnesota
PHONE/FAX NUMBER: 651-284-5265 / 651-284-5729
E-MAIL ADDRESS: jim.vogel@state.mn.us

BUSINESS REQUIREMENT/ISSUE: (statement of the issue and business need for the change, including the following)

Minnesota statutes and rules require us to monitor the timeliness of the initial payment of benefits such as Permanent Partial Disability (PPD) - see Minnesota Rules 5220.2550. Because PPD benefit payments can commence while the employee is currently receiving Temporary Partial Disability (TPD), MTC AB (Add Concurrent Benefit Type) would be sent to show the initial payment of the PPD benefits being paid simultaneously with TPD benefits. In the definitions of DNs 0192 (Benefit Payment Issue Date) and 0195 (Payment Issue Date), only certain MTCs are allowed to require these DNs and MTC AB is not one of the MTCs included in the list.

REQUESTER'S PROPOSED SOLUTION (Optional):

Include MTC AB in the definitions for DNs 0192 and 0195 as an MTC where these DNs can be required.
