

# IRR 828 – Admin Changes for 3.1

## Forward

Introduction – Updated introduction provided by the IAIABC

## Section 1: Jurisdiction EDI Preparation

Preparation Instructions – Changed references from 3.0 to 3.1

## Section 2: Technical Documentation

- All references to R3.0 were changed to R3.1
- Requirement Code reference table with results of failed requirement edits was inserted. The table will be modified when the Claims R3.1 Element Requirement tables are completed
- References to new segments and their positions within the record layout were included
- References to acknowledgment record were changed from AKC30 to AKC31
- New variable segments and references to their positions within the record layout were added to the Processing Rules
- Modified item number 10 in the Release 3.1 Assumptions regarding requiring new data elements on legacy claims.
- Added language to the Claim Administrator section to indicate that transactions should be reported in the sequence that the event(s) occurred
- Minimum and Maximum record lengths were calculated and updated

## Section 3: Acknowledgment Scenarios

Scenarios will be updated per 3.1 IRRs

## Section 4: Business/Technical Process Rules

- Business/Technical Process Rules Index – Updated with new page numbers once IRRs are incorporated
- Variable Segment Population Rules - Added FROI 2.c and 3.d, SROI 5.e and 6.d and removed UR from 2.b and 3.c and SROI 5.b and 6.c , Added NT and AC to Minimum number of benefits E0
- Transaction Sequencing – Added EP to AB and PX rules

## Section 5: Business Scenarios

This section will be a placeholder indicating that scenarios are now published outside of the guide with a link.

## Section 6: Data Dictionary

A - DN074 Agreement to Compensate Code added DN number to DP rule for DN 75, Acknowledgement Set ID - Bolded entry (formatting change)

B - Added DN number to Definitions and DP rules for consistency when first referencing another DN in a definition.

C - DN139 Fax number removed, Claim Type Code DN74 under medical only "for jurisdiction's that have..." should be jurisdictions, Current Date Disability DN144 added DN number in DP Rule, Current Date Last Worked DN145 added DN numbers in DP rule

H-I - Insolvent Insurer DN292 changed who to that, Interchange Server ID added DN 105

M- Updated RE to reference trading partner tables instead of trading partner agreement. Look at suspension reason codes in new approved IRR to make formatting changes suggested. DN231 DP rule updated to fix grammatical errors.

V-Z - Wage Effective Date DN 256 capitalized Average Wage and updated Date of Accident to Date of Injury and included DN numbers, Wage Period Code DN63 DP rule updated with other DN's DN Numbers, Work Days Scheduled Code DN 205 DP rule updated other DNs with DN numbers, Work Week Type Code DN 205 updated DN numbers to be consistent.
