The Hartford Insurance Group	No	The Hartford has no objection to having the payment issue date required on the two additional MTC filings (CA and CB). What we have concerns with is the comment that if a subsequent payment has issued before the MTC is successfully filed the payment date of the subsequent payment be provided. This does not appear to support the regulatory requirement and I would believe difficult to determine timeliness when the new payment date is not the one that triggered the requirement to file the report.	No	Same as above. The problem we have is with the subsequent payment being included as if it was the payment that triggered the need to file when it was not.
